

A large white wind turbine stands on a green grassy hill. The background features rolling hills, distant mountains, and a sky with soft, golden clouds, suggesting a sunset or sunrise. The overall scene is peaceful and emphasizes renewable energy.

ENECHANGE INSIGHT RENEWABLES

By:
ENECHANGE

September 2024

Who We Are

ENECHANGE

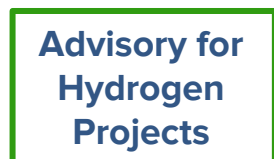

ENECHANGE: TYO: 4169

- ❑ Energy technology company listed on Tokyo Stock Exchange in 2020
- ❑ Biggest energy switching website for domestic & commercial customers; ~ 500,000+ households equivalent
- ❑ Largest public EV charging network in Japan

Fund to invest in RE opportunities in Turkey and Jordan.

Partnered by:

Consultants for a large Japanese Oil and Gas company on green hydrogen and carbon credits in the MENA region.

Fund dedicated to startup investments in climate tech.

Partnered by:

Climate tech accelerator program for startups in the decarbonization and energy sectors.

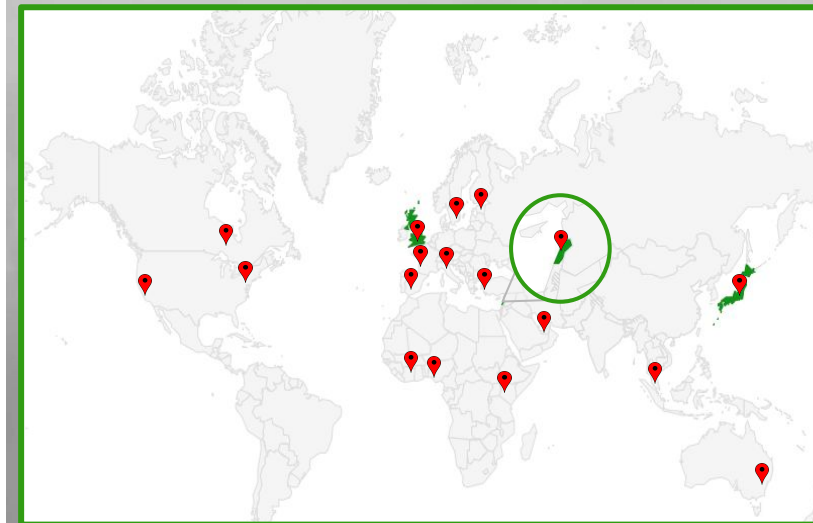

WHAT IS ENECHANGE Insight Renewables (EIR)?

EIR is a professional **renewable energy systems investment platform** with main offices in London, Tokyo and Beirut; managed and operated by ENECHANGE.

We provide **market insight** and **premium access to attractive RE projects**.

We support our clients and partners through investment match-making, providing knowledge products and closing gaps within the renewable energy value chain.

Enechange Offices

EIR Members

How EIR Works

The Database

We host a database of opportunities under our premium access platform to help connect investors to partners. Our team is always in an ongoing communication between the investors and developers to ensure the best support.

EIR Talks

Our video on-demand service hosts international developers, market analysts and investors in the purpose of sharing knowledge and building unique relationships.

Specialist Talks

Specialist Talks is a webinar series offering startups and tech providers a stage to present their innovations. It's a chance for industry experts to share and connect and for attendees to learn about emerging technologies.

Project Database: 750+ active projects

150+ Registered Developers/ Advisory firms/ Investment Funds

40+ descriptive fields and criteria for each project

FiT, C&I, Spot Market coverage

Coverage of all development stages

	Technology	Projects	Capacity (MW)
	Solar	535	31,909
	Solar + Storage	152	11,742
	Wind	25	9,977
	Hydro	16	1,027
	Others	31	9,387
	Geothermal, biomass, waste-to-energy, solar + hydrogen		
	Total	750+	~64,000

Project Database: Sample

#	Region	Project Type	Technology	COD	Capacity (MWp)	Policy	+35 additional criteria
